PROJECT

Contatly – Flutter Mobile App

- Built a contact management app with dynamic call and email features.
- Stored and managed contacts using arrays with a simple, user-friendly UI.

Flutter Mobile Application

- Developed a responsive mobile application using Flutter and Dart.
- Implemented multiple screens with clean UI using Material Design.
- Integrated basic Firebase features for data storage and authentication.
- Followed clean code practices and proper folder structure.

Two-Player Tap Game – Flutter Application

- Created a two-player mobile game using Flutter and Dart.
- Implemented tap-based mechanics with dynamic space increase and decrease logic.
- Added win-condition logic to identify the player who fills the opponent's space first.
- Focused on performance, responsiveness, and user experience.
